### DETAILED ACTION

1. An action on the merits of claims 1-7 considered readable on Species A (Figures 1A and 1B) is included in this office action with claims 8-24 being withdrawn from consideration. 37 C.F.R. § 1.142(b). Election was made with traverse in the response filed May 14, 2004. The species are considered to be patentably distinct as claimed. The requirement is still deemed proper and is therefore made FINAL.

Claim 8 appears to be readable on Figure 5. Claim 18 is not readable on the elected species in view of the recitation in line 5 of "two auxiliary buffering units movably mounted on two sides of the carrier".

2. All submitted prior art has been considered.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Akimaru et al(US 20030035362A1) or Masaki et al(US006741544B1).

Note auxiliary buffering units 9 of Figures 2, 6, 7, 8a, etc., of Akimaru and Figure 5 of Masaki et al with auxiliary buffering units 40.
